

Optimizing Managed Care Revenue

Are you billing the correct revenue for managed care patients?

Managed care success is dependent on management of a skilled stay – from admission to discharge. Operationally-sound case management systems, best practices and efficiency are a lifeline to financial vitality.

Is your facility team maximizing current managed care contracts?

Prime Care Technologies brings together 15+ years of data integration and senior care expertise to deliver our solution. Managed Care MASTER is designed to help you capture and optimize managed care reimbursement.

Next Generation Software for Managed Care Case Management

- Guides staff through best-practice, step-by-step case management for managed care
- Synthesizes data from managed care contracts, EMR systems and case manager reporting applications

Managed Care MASTER Features

- Contract Integration
- Patient Stay Data
- Level-of-Care Alerts
- Documentation & Tracking
- Case Management Best Practices
- Customizable KPI Dashboard

About Us

Since 2003, Prime Care Technologies has equipped long-term care providers with flexible cloud-based services and applications that drive operational excellence. Integrating data from in-house systems and third parties, we provide powerful applications – like Managed Care MASTER – that offer the visibility, automation and reporting to impact workforce, revenue and performance.

One Solution – Pre-Admission to Collections

Contract Integration - Access to contracts for capturing appropriate level reimbursement and for directing staff

Patient Stay Data - Central console organized for efficient case management

Level-of-Care Alerts – Patient action alerts that act as a gatekeeper and provide calls-to-action

Case Management Tools – Best practices for properly managing skilled care stays

Documentation & Tracking - Staff can more easily meet requirements for external case managers

Customizable KPI Dashboard - Decision-makers easily can choose views for daily performance and outcomes

LET US HELP WITH THE COMPLEXITIES AND NUANCES OF MANAGED CARE

Managed Care MASTER is specifically designed for post-acute providers seeking to meet the demands of complex managed care contracts.

Our solution helps maximize your staff's time and efficiency through best practice case management. Now you can manage multiple payer contracts and optimize revenue without adding strain to the delivery of cost-effective care.

- Automated integration of payers and population
- One login to streamline case management across multiple payers
- Real-time updates for case management reduces redundant effort from skilled staff
- Increased efficiency, effectiveness and job satisfaction for case managers
- Executive-level reporting for enterprise-wide visibility
