

Drive Your Post-Acute Care Performance with Accurate and Timely Benchmarks

Getting accurate and timely facility performance data is a struggle. Census, labor, accounts receivable, satisfaction scores, Five-Star Quality Ratings – all come from different sources, at different times, and are often lacking standardization and benchmarks. Without reliable data, how can you identify and address quality of care?

Our primeVIEW solution solves this challenge by consolidating data from various systems into an easy-to-navigate interface that automatically refreshes in near real time. The result is an unparalleled, multi-dimensional view of operational performance supported by benchmarks, rankings and trends. It's everything you need to make data-driven decisions.

One Powerful Dashboard for All Key Performance Indicators

- Leverage interactive views to run daily meetings.
- Accelerate decision-making and productivity with accurate facility/patient views.
- Quickly identify trends with enough time to proactively affect outcomes.
- Cultivate performance to your competitive advantage.

RIGHT DATA

Census/occupancy
Population metrics
Staffing
Revenue cycle management
Five Star
Clinical and internal rehab
PBJ reporting

RIGHT DECISIONS

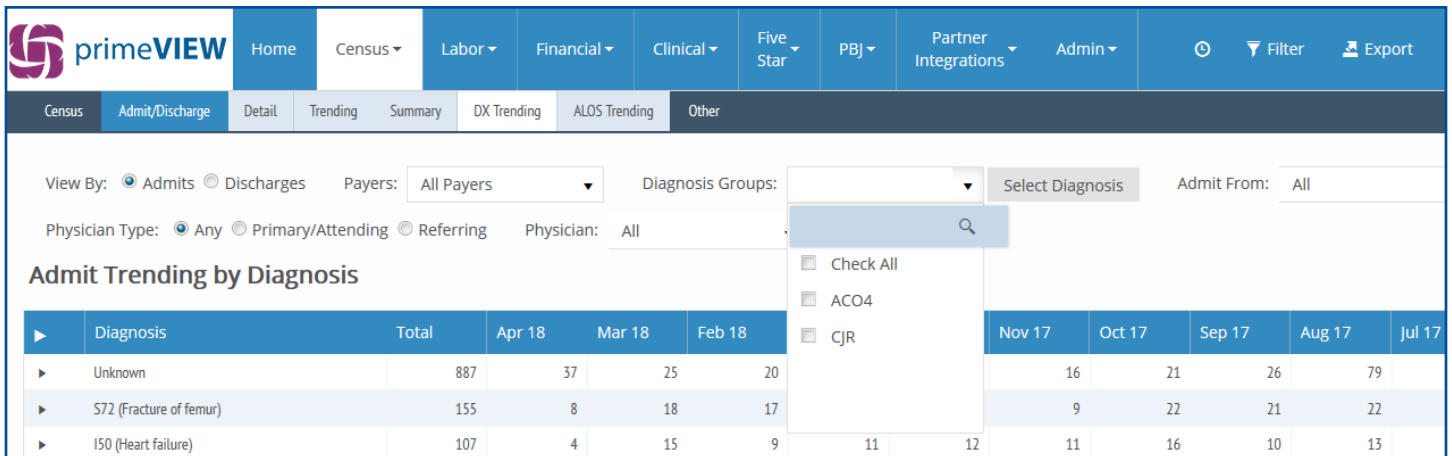

Configurable dashboards
Corporate/regional/facility views
Drill-down details by patient, diagnosis, payer
Population health analysis (bundles, CJR, etc.)
Outcome visualization and management
Efficiency to impact quality

RIGHT NOW

Secure web-based data
User-defined alerts
Actual-to-budget comparisons
Anytime access to reporting
Timeframe filters
Custom refresh rates
XLS or PDF exports

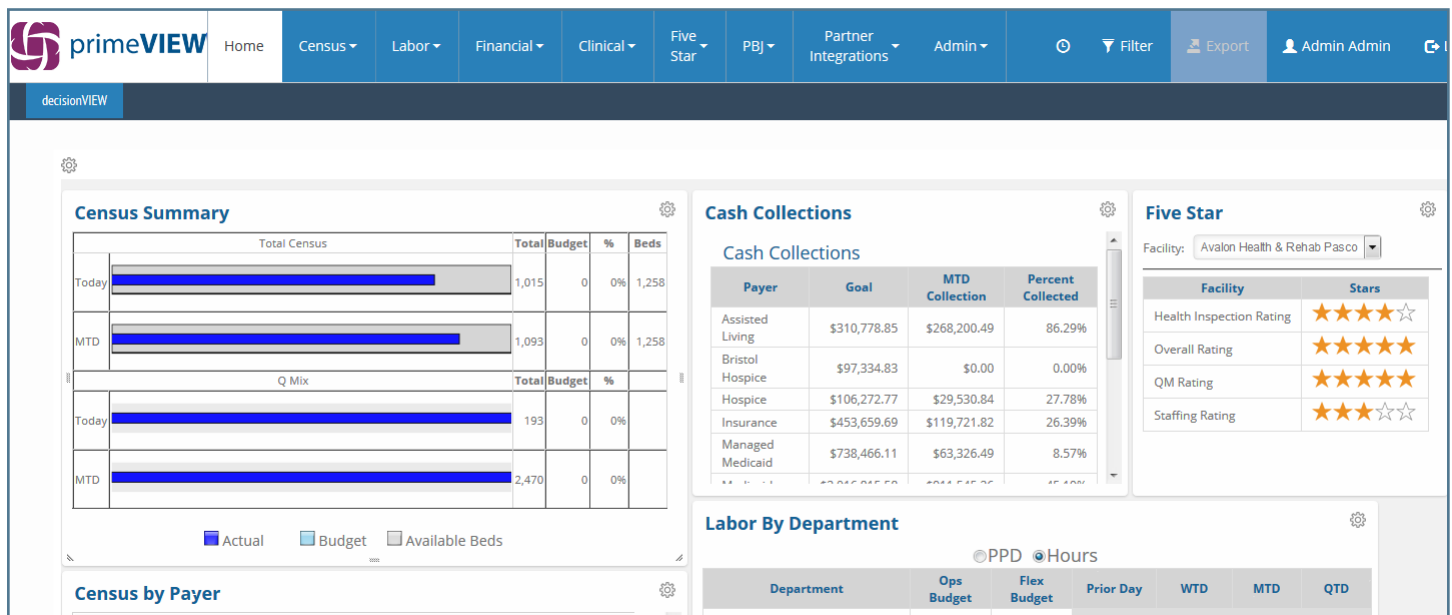

Proactive Outcome Management

Powerful primeVIEW analytics let you drill down to resident and diagnosis levels to help you evaluate additional outcomes. Check rehospitalization rates by admitting hospital, facility or diagnosis with ease.

Convenient Morning Meeting View

Our Morning Meeting view consolidates your most critical KPIs, arming you and staff to start each day productively.
