

STRESS-FREE WiFi MANAGEMENT SERVICE

Network problem tickets increase costs
and decrease productivity!

Keep your business running efficiently
with full IT service and WiFi alerts
proactively resolve WiFi performance
issues before they become
unmanageable.

primeWIFI.AI technicians are able to
identify issues remotely and provide a
solution. If needed, our expertise may
be deployed to resolve network issues.

Real-time issue alerts ensure that your
business can run uninterrupted by identifying
and addressing WiFi performance issues at
the source.

High-performance WiFi management backed
by our IT expertise. primeWIFI.AI allows
precise performance from each access point
with our IT engineers, improving the end-user
experience.

24/7 remote troubleshooting and
optimization means a substantial reduction
in the typical travel costs accumulated for
WiFi-related malfunctions.

primeWIFI.AI

Next-Generation WiFi, For Every Industry

WHAT IS IT?

primeWIFI.AI is a platform that can forecast and provide the answers to solve network problems within seconds. No more hassle, no more downtime, and no more waiting for IT service technicians to arrive!

WiFi ANALYTICS

primeWIFI.AI analyzes, optimizes, and automatically provides problem and solution identification for your WiFi network.

BENEFITS

1. Flexible

primeWIFI.AI is compatible with any infrastructure capable of gathering data from any WiFi or wired device.

2. User Friendly

It automatically configures itself for you. With an internet connection, plug the sensor into an ethernet port, and primeWIFI.AI will do the rest.

3. Remote Diagnostics

Remote diagnostics with primeWIFI.AI will identify, monitor, and supply a solution to problems. You will no longer sit on hold with IT service technicians, saving time, energy, and money.
